## Stratification of Trigeminal Neuralgia Surgical Outcome Categories Using Multimodal Data and Machine Learning

Figures & Captions

Dataset demographics	Initial diagnosis of Classical TN
Sample size (n)	104
Age (years)	$60.3 \pm 14.4$
Sex (males : females)	44:60
Pain side (L:R)	38:66
Surgery (GK : MVD)	70:34
Surgery outcome	
Non-responders (n)	34
Recurrence within 5 y after surgery (n)	50
Pain-free for more than 5 years (n)	20
